

Residential Customer Service Lead Inspection Form

Customer's Name _____

Location of Inspected Property _____

Public Water System Name BECKER-JIBA WATER SUPPLY CORPORATION

Inspector Name _____ Inspector Qualifications _____

The State Lead Ban requires that, for any private plumbing facilities installed after July 1, 1988, no pipe or pipe fixture can contain more than 8.0% lead and no solder or flux can contain more than 0.2% lead when the water from the plumbing facilities is to be used for drinking or food preparation.

The water utility may inspect: plumbing supplies, fixtures, and solder or flux to verify compliance with this requirement.

Lead Inspection Form		
Fixture or Solder Location	NSF Approval or MSDS Provided	Results of Scrape Test

By signing this document, the homeowner and plumber certifies that all plumbing meets, to the best of their knowledge the state lead ban requirements.
